the Kingdom

HAWK 1 RIV 1
RAPID INTERVENTION VEHICLE
Total Safety Solutions

Built over GMC3500HD / Ford 350HD
Single Cabin (Driver + 1 Crew)
Water Tank Capacity is 800L - 1000L
Foam Tank Capacity is 100L - 200L

Quality Approvals for Various Products and Services

SFFECO Hawk Series 1 RIV1 is a rapid intervention vehicle and the most demanding model for municipal & industrial fires. It is a compact but reliable firefighting apparatus, specially designed for urban areas where accessibility of big firefighting truck is a challenge. It is the cost efficient way of bringing the fire under control.

SFFECO Hawk Series 1 RIV1 is commonly built on GMC/Ford Chassis.

Body Work:

The body structure is so designed to allow the most rugged operation condition. Compartment rooms are readily available for carrying necessary tools and equipment. Holders are provided so that equipment will remain in place under running conditions and permit quick removal for use. Service openings and access doors are also provided at important areas where inspection and maintenance work is very vital.

Equipment and Compartment:

Fire equipment storage compartments are designed for safety and convenience, featuring rolling shutters or lockable mechanisms to securely store essential firefighting equipment in the vehicle.

Any type of standard or optional firefighting equipment can also be provided according to customer requirements.

Water Tank: (Capacity is 800L - 1000L)

The water tank is constructed from high-quality, corrosion-resistant Type 304 stainless steel, ensuring long-term durability. It features a robust 3 mm wall thickness along with a 3 mm base thickness, providing enhanced structural strength and resistance to wear, impact, and environmental factors.

Foam Tank: (Capacity is 100L)

The tank is made of corrosion proof stainless steel sheet 316L, 3mm wall thickness and 3mm base thickness. The tank is designed to store all known foam compounds in all running condition.

Note: In addition to Water or Foam systems, Dry Chemical Powder Systems or other special configurations can be manufactured according to customer requirements.

Fire Pump :

Hawk 1 RIV 1 is typically supplied with Tohatsu VC52AS or VC72AS models, offering reliable performance and efficient operation for a wide range of applications.

These standard models are selected to ensure optimal compatibility and dependable functionality. However, to meet specific project requirements or customer preferences, other models can also be provided upon request, ensuring flexibility and adaptability for various operational needs.

Pump Performance:

950LPM @ 10 BAR

Monitor:

Dual Gear Manual Operation,
2½" two way waterway type monitor

Model : SF-26A

Nozzle Model : SL-19MS

Flow : 400 Lpm @ 7 Bar

Shooting Range : 38 Mtr. @ 45 Deg.

Other Accessories:

- Hose Holder
- Synthetic Hose
- Hose Nozzle
- Hose Reel
- Hydrant Wrench
- Hose Spanner for Fire Hose & Suction Hose
- Powder Extinguisher & CO2 Extinguisher
- Aluminum Two Section Ladder
- Suction hose and Check Valve with Strainer
- Light bar

Note: Accessories are optional and can be customized to meet any customer requirement.
