HAWK 2

MEDIUM SIZE FIREFIGHTING VEHICLE

Total Safety Solutions

Built over Mercedes Chassis

Single Cabin (Driver + 1 Crew)

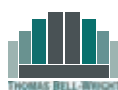

Water Tank Capacity is 3000L - 5000L

Foam Tank Capacity is 300L - 500L

Quality Approvals for Various Products and Services

Assessed to ISO 9001:2015
Cert. No.: 1516

The SFFECO Hawk Series 2 stands as the most advanced and highly sought-after model in the field of fire fighting vehicles, designed to meet the intense demands of both municipal and industrial fire emergencies. This versatile and robust firefighting apparatus is engineered to handle the most challenging fire scenarios, offering an exceptional capacity to carry larger quantities of water and foam. This allows for extended firefighting operations without the need for frequent resupply. Whether it's tackling hazardous industrial fires or providing swift response in urban environments, the SFFECO Hawk Series 2 is built to deliver unparalleled performance and reliability, becoming an indispensable asset for modern firefighting operations.

SFFECO Hawk Series 2 is commonly built on IVECO/ISUZU Chassis.

Body Work:

The body structure is so designed to allow the most rugged operation condition. Compartment rooms are readily available for carrying necessary tools and equipment. Holders are provided so that equipment will remain in place under running conditions and permit quick removal for use. Service openings and access doors are also provided at important areas where inspection and maintenance work is very vital.

Equipment and Compartment:

Fire equipment storage compartments are designed for safety and convenience, featuring rolling shutters or lockable mechanisms to securely store essential firefighting equipment in the vehicle.

Any type of standard or optional firefighting equipment can also be provided according to customer requirements.

Water Tank: (Capacity is 3000L - 5000L)

The water tank is constructed from high-quality, corrosion-resistant Type 316L stainless steel, ensuring long-term durability. It features a robust 4 mm wall thickness along with a 5 mm base thickness, providing enhanced structural strength and resistance to wear, impact, and environmental factors.

Foam Tank: (Capacity is 300L - 500L)

The tank is made of corrosion proof stainless steel sheet 316L, 4mm wall thickness and 5mm base thickness. The tank is designed to store all known foam compounds in all running condition.

Note: In addition to Water or Foam systems, Dry Chemical Powder Systems or other special configurations can be manufactured according to customer requirements.

Fire Pump :

Hawk Series 2 is typically supplied with MALECO NIAGARA model fire pump, offering reliable performance and efficient operation for a wide range of applications. These standard models are selected to ensure optimal compatibility and dependable functionality. However, to meet specific project requirements or customer preferences, other models can also be provided upon request, ensuring flexibility and adaptability for various operational needs.

Pump Performance:

2000 LPM @ 10 BAR

250 LPM @ 40 BAR

Monitor:

Manual controlled water monitor

Flow: 1,500 LPM @ 10 BAR

Shooting Range:

45-50 meter for water

40 meter foam water mix

Other Accessories:

- Hose Holder
- Synthetic Hose
- Hose Nozzle
- Hose Reel
- Hydrant Wrench
- Hose Spanner for Fire Hose & Suction Hose
- Powder Extinguisher & CO2 Extinguisher
- Aluminum Two Section Ladder
- Suction hose and Check Valve with Strainer
- Light bar

Note: Accessories are optional and can be customized to meet any customer requirement.
