## HAWK 3

MEDIUM SIZE FIREFIGHTING VEHICLE

*Total Safety Solutions*

Built over Mercedes Chassis

Single Cabin / Double Cabin

Water Tank Capacity is 5500L - 7500L

Foam Tank Capacity is 550L - 750L

Quality Approvals for Various Products and Services

The SFFECO Hawk Series 3 is our most advanced and highly efficient fire truck, specifically designed to meet the demands of both municipal and industrial firefighting operations. Built for maximum performance, it claims an enhanced capacity to carry larger volumes of water and foam, ensuring longer operational durations without the need for frequent refills. In addition to its impressive fluid capacity, the SFFECO Hawk Series 3 comes equipped with a full array of specialized firefighting tools and equipment, providing fire crews with everything needed to tackle diverse fire scenarios. Whether combating large-scale industrial blazes or responding swiftly to urban fires, the Hawk Series 3 offers unmatched reliability and operational efficiency, making it the ultimate choice for demanding firefighting challenges.

SFFECO Hawk Series 3 is commonly built on IVECO Chassis

### Body Work:

The body structure is so designed to allow the most rugged operation condition. Compartment rooms are readily available for carrying necessary tools and equipment. Holders are provided so that equipment will remain in place under running conditions and permit quick removal for use. Service openings and access doors are also provided at important areas where inspection and maintenance work is very vital.

### Equipment and Compartment:

Fire equipment storage compartments are designed for safety and convenience, featuring rolling shutters or lockable mechanisms to securely store essential firefighting equipment in the vehicle.

Any type of standard or optional firefighting equipment can also be provided according to customer requirements.

### Water Tank: (Capacity is 5500L - 7500L)

The water tank is constructed from high-quality, corrosion-resistant Type 316L stainless steel, ensuring long-term durability. It features a robust 4 mm wall thickness along with a 5 mm base thickness, providing enhanced structural strength and resistance to wear, impact, and environmental factors.

### Foam Tank: (Capacity is 550L - 750L)

The tank is made of corrosion proof stainless steel sheet 316L, 4mm wall thickness and 5mm base thickness. The tank is designed to store all known foam compounds in all running condition.

**Note:** In addition to Water or Foam systems, Dry Chemical Powder Systems or other special configurations can be manufactured according to customer requirements.

### Fire Pump :

Hawk 3 is typically supplied with a MALECO NIAGARA model fire pump, offering reliable performance and efficient operation for a wide range of applications. These standard models are selected to ensure optimal compatibility and dependable functionality. However, to meet specific project requirements or customer preferences, other models can also be provided upon request, ensuring flexibility and adaptability for various operational needs.

### Pump Performance:

3000 LPM @ 10 BAR

400 LPM @ 40 BAR

### Monitor:

Manual controlled water monitor

Flow: 2,400 LPM @ 10 BAR

### Shooting Range:

60-65 meter for water

55-60 meter foam water mix

### Other Accessories:

- Hose Holder
- Synthetic Hose
- Hose Nozzle
- Hose Reel
- Hydrant Wrench
- Hose Spanner for Fire Hose & Suction Hose
- Powder Extinguisher & CO2 Extinguisher
- Aluminum Two Section Ladder
- Suction hose and Check Valve with Strainer
- Light bar

Note: Accessories are optional and can be customized to meet any customer requirement.
