About SFFECO

Since 1983, SFFECO has been the trusted name and a recognized global leader in manufacturing top-tier fire-fighting equipment. We don't just offer products; we provide total fire safety solutions like fire doors, fire cabinets, fire pumps, fire extinguishing systems, etc. Our commitment to excellence is certified by multiple international standards, including ISO 9001 (Quality), ISO 14001 (Environmental), and ISO 45001 (Health & Safety). With state-of-the-art facilities in Riyadh and Dubai, we ensure every product meets rigorous international quality standards.

SFFECO is your single source for everything in fire protection and fire-fighting. Represented in over 100 countries through a vast network of dealers, our innovative approach and comprehensive, end-to-end product range deliver the full spectrum of solutions you need. We're dedicated to keeping you safe and updated, constantly integrating the latest fire-fighting technology into our knowledge and services. Choose SFFECO and get certified quality, global reach, and pioneering innovation—all in one place.

About SFFECO Pump House

The high-quality construction and state-of-the-art design make the SFFECO Pre Packaged Pump House the ideal fire pump housing.

Designed with robust construction and meticulous engineering, this pump enclosure protects the fire pump and other components from external elements and damage.

As well as protecting, this unit also helps to organize the pump and components properly and makes them easier to access when needed.

All internal wiring and piping is done at the factory and external connectors are provided on the outer surface of the enclosure that enables easy piping and power connection at the field.

Complete fire pump set assembly is fixed inside a pump house enclosure with all fire pump related standard accessories, valves and fittings and pump testing instruments as required.

The pump house also can be provided with lighting, heat detectors, extinguishers, etc. as additional accessories upon customer request.

It is possible to make this unit in a variety of sizes and designs, depending on the needs of the customer. With a standard pump house, the following components can be included as customer requirements:

- | | |
|--------------------------------------|---|
| ❖ Diesel Engine and Pump | ❖ Mild Steel Structure and Skid |
| ❖ Electric Motor and Pump | ❖ Exhaust Pipe Line |
| ❖ Jockey Pump | ❖ Suction Pipe Line |
| ❖ Fire Pump Controller | ❖ Discharge Pipe Line |
