Powder Trailer Unit

- 250 to 500Kg Powder Tank Options
- Various Fire Pump Options
- Modular Design
- Upgrade Ready
- Equipment Compartments
- Corrosion Resistant
- Application Versatility

Quality Approvals for Various Products and Services

Trailer Unit

Water Trailer Unit

Body Work:

SFFECO manufactures robust, high-performance trailer-mounted dry powder fire-fighting units designed for a wide range of demanding applications. Equipped with a dry powder storage tank and nitrogen cylinders for pressurization, these units ensure rapid discharge and effective fire suppression in critical situations. The system integrates a powder hose reel for controlled application, combining mobility, reliability, and operational efficiency.

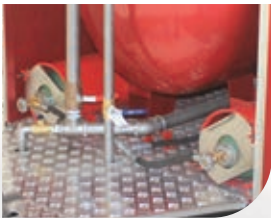

Available in various powder capacities with customizable hose reels and fire-fighting accessories, each unit can be tailored to meet specific customer requirements.

Applications:

Ideal for industrial complexes, chemical plants, oil & gas facilities, refineries, remote sites, mining areas, warehouses, construction sites, and other high-risk operations.

Key Features & Specifications:

- Heavy-duty construction with single or dual axle options for maximum stability and load-bearing capacity
- Designed for rough, uneven, and off-road conditions with excellent maneuverability
- Dry powder storage tank with nitrogen cylinder pressurization system
- Integrated powder hose reel system for controlled and efficient discharge
- Quick activation and simple operation for immediate emergency response
- Available in various dry powder capacities as per customer requirement
- Minimal maintenance requirements with durable components
- Optional compartments and corrosion-resistant materials available on request
- Equipped with pressure relief devices, secure locking systems, and ergonomic operator access
