Trailer Unit

Water Trailer Unit

Body Work:

SFFECO manufactures various types of trailer-mounted fire-fighting units designed for a wide range of demanding applications. Equipped with water tanks, these units combine mobility, reliability, and operational efficiency to deliver rapid and effective fire suppression in critical situations.

Available with various tank capacities, hose reels and fire-fighting equipment, this unit can be tailored to meet specific customer requirements.

Applications:

Ideal for industrial complexes, chemical plants, oil & gas facilities, remote sites, mining areas, warehouses, construction sites, and other operations.

Performance Assurance:

Engineered and tested to meet various fire safety standards and deliver consistent results under extreme conditions.

Key Features & Specifications:

- Heavy-duty construction with single or dual axle options for maximum stability and load-bearing capacity.
- Designed for rough, uneven, and off-road conditions with excellent maneuverability.
- Integrated high-capacity pumps engineered for consistent flow rates and rapid deployment.
- Optimized hoses, reels, and nozzles for controlled and effective agent application.
- Quick setup and simple operation for immediate response to emergencies.
- Various capacities of Water Tanks are available as per customer requirement.
- Minimal maintenance requirements.

Modular design enables full customization to meet specific customer requirements and future upgrades, with optional compartments and corrosion-resistant materials available on demand.

- Available Pressure relief systems, secure locking mechanisms, and ergonomic access for operators.
