Fire Blanket

SFECO Fire Blankets are simple to use and highly efficient fire fighting units which can extinguish fire in its early stage by smothering. They withstand extremely high temperature.

A fire blanket is ideal for extinguishing cooking fat fires and can be used to wrap around people if their clothes catch on fire. In a residential situation, a fire blanket can be located in the kitchen. In commercial situations, it should be kept anywhere oils or fats, being used in cooking appliances, are a possible fire risk.

Applications:

Schools Educational institutions	Hospitals Healthcare facilities	Apartments and Hotels	Laboratories Research facilities	Vehicle service centers	Ships Marine vessels	Galleys Commercial kitchens	Industrial outlets
