# Fire Blanket

SFFECO Fire Blankets are simple to use and highly efficient fire fighting units which can extinguish fire in its early stage by smothering. They withstand extremely high temperature.

A fire blanket is ideal for extinguishing cooking fat fires and can be used to wrap around people if their clothes catch on fire. In a residential situation, a fire blanket can be located in the kitchen. In commercial situations, it should be kept anywhere oils or fats, being used in cooking appliances, are a possible fire risk.

## Applications:

|                                        |                                       |                          |                                        |                               |                            |                                    |                       |
